

PRODUCT CHANGE NOTIFICATION

ENCODER

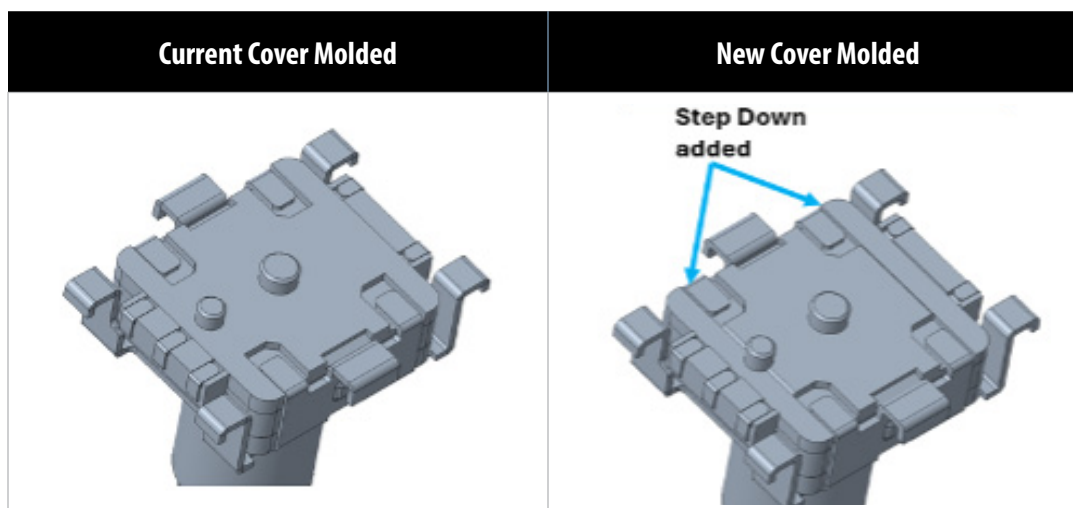

Bourns® PEC11J Series 12 mm SMD Long Life Encoder

Solderability Change

Riverside, California – June 15, 2026 – Effective June 30, 2026, Bourns will modify the molded cover of the PEC11J Series 12 mm SMD Long Life Encoder to improve solder process reliability. The modification adds a step-down feature to the sides of the cover that prevents solder from flowing to the terminals during reflow when the bracket is installed.

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.

SC2620

The form, fit, function, quality, and reliability of the PEC11J Series remain unchanged as a result of this modification. All specifications remain unchanged. Qualification testing has been performed against all specifications, and reliability data is available upon request. Samples are also available upon request. Bourns recommends that customers verify satisfactory performance of the affected part numbers in their specific applications. For questions or additional information, contact Customer Service/Inside Sales.

Implementation dates are as follows:

Date that deliveries of product manufactured with the current solderability will cease: ***June 29, 2026***

Date that deliveries of products manufactured with the new solderability will begin: ***June 30, 2026***

First date code using the above changes: **2627**
