

Product change notification (PCN)

Title / short description	UK 35 mould replacement
Affected article category	Terminal blocks
Change category	Form and appearance
Change number	PBE210263-00
Reason for PCN/PDN Revision	

Purpose/objective of the change

The change is required as the existing moulding tools are about to reach the end of their lifetime. Replacing the tools ensures long-term production capability and improves process stability.

Detailed description of the change

The existing moulding tools will be replaced by new moulding tools. As part of this tool replacement, a process change will be implemented, transitioning from cold runner moulding to hot runner moulding. This change will result in a minor, non-functional visual difference in the form of the addition of an injection point on the products.

The change has no impact on the functional properties, performance, or specifications of the products. Existing and new versions are fully interchangeable and can be used together without any restrictions.

Identifying characteristics

The new versions can be identified by:

- The addition of an injection point
- An updated V/C (Version Change) index

Visual comparisons of the existing and new product versions are provided in the attached PDF. A list of affected articles, including current and updated V/C indices, is provided in the table below.

Start of Production (SOP)	-	Last Time Delivery (LTD)	-
Effective date (EOP)	2027-01-11	End of Service (EOSR)	-
End of Sales (EOS)	-		

Short-term change (< 6 months) or discontinuation (< 12 months), due to:

- | | | |
|---|---|--|
| ☐ Software / Firmware Bugfix | ☐ Short-term delivery stop by supplier | ☐ Short-term recall by supplier |
| ☐ Force majeure | ☐ Product improvement with customer benefits | |
| ☐ Others | | |
