The Zyklop Mini ratchet 2

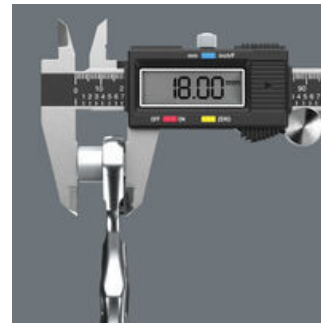

Zyklop Mini ratchet for the direct mounting of the Zyklop 8790 FA special sockets with 1/4" and Hex 11 hexagon drive

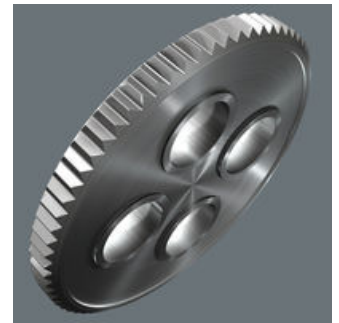

The Zyklop Mini ratchet 2 is suitable for the direct mounting of the Zyklop 8790 FA special sockets.

For small spaces

With its small size, the Zyklop Mini ratchet is ideal for all particularly tight installation spaces - especially in combination with the low-profile (18 mm) 8790 FA sockets.

Small return angle of 6°

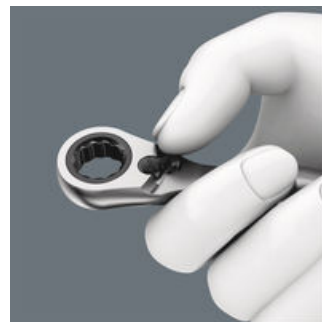

The fine-toothed mechanism of the Zyklop Mini ratchet 2 with 60 teeth allows a small return angle of 6° for precise working.

Solid steel for high torque transfer

Thanks to the robust, drop-forged solid steel design of the Zyklop Mini ratchet, up to 65 Nm can be transferred.

Reversible clockwise/counterclockwise

Switching from clockwise to counterclockwise rotation and vice versa is easy using the reversing lever, which can also be operated with just one hand.

Insert ratchet and sockets for thread rods

The head of the Zyklop Mini 2 ratchet is hollow in the centre - as are the 8790 FA sockets. This allows thread rods up to M 6 to pass completely through the tool during use, and hexagon nuts can be tightened and loosened.
