YELLOW Flag Notice Time to Product Change: 6 Months

Note: The yellow flag notification indicates a **significant** change in form, fit, or function of an offer.

Product Name(s): SSM1 Solid-State Relays

Customer Support No. 1(847) 441-2540

Product Line Description: Single Phase, DIN rail mounted solid-state relays with built in heatsink

Document Issued: 08/14/2026

Description of Change:

SSM1 single phase solid-state relays are experiencing a form, fit, function change in **late November 2026 (estimated execution around 11/22/2026)**.

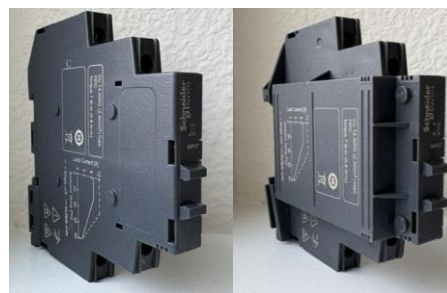

Primarily, there are various electrical spec changes with small current input and surge improvements. Physical changes are minor including labeling and the absence of telescopic screw terminal options. Dimensions and form-factor are virtually the same. Overall, these present minor changes to the interior for a more efficient design. See comparison sheet for specifics.

Part numbers will remain the same. Because of this, **the true change over date may depend on depletion of stock on the old version before new versions begin to ship out.**
