Bourns® SRR1210 and SRR1210A Series Shielded Power Inductors

Change in RI Core Design

Riverside, California – August 19, 2026 – As part of our continuous improvement efforts, effective June 1, 2027, Bourns will change the RI Core design for the SRR1210 and SRR1210A Series Shielded Power Inductors. A positioning structure will be added to the RI core to enhance structural robustness. A list of affected part numbers is included below.

The form, fit, and function of the finished products will remain the same. The quality and reliability of the inductors should be improved. Traceability will be maintained through lot code and date code.

Samples are available upon request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

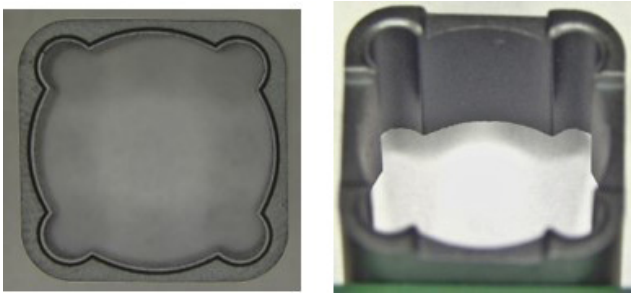

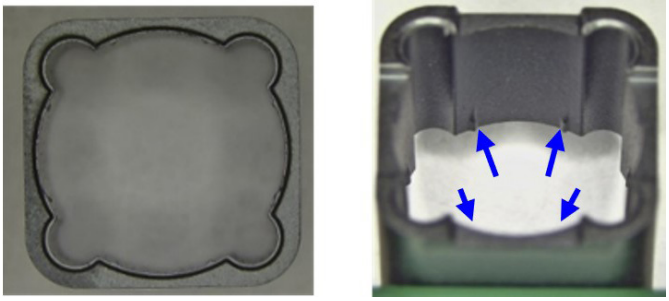

Date that products manufactured with the current RI core will cease: ***2027-05-31***
Date that deliveries of products manufactured with the new RI core angle will begin: ***2027-06-01***
First date code using the above changes ***2722***

If you have any questions or need additional information, please feel free to contact Customer Service/Inside Sales.

Users should verify that the described changes will not impact the performance of the product in their specific applications.
