Customer Product/Process Change Notification

PCN # 144585
Issued Date: 8/28/2026
Issued By: Patrick Lay
Author: Patrick Lay

Change affects whole product family?	Yes

Part #'s affected (See attached if entire product family is affected)

See attached list for full list of item numbers and details. Items to be sorted in groups, batch numbers, per schedule listed below. Batch numbers are listed on the second page of this document.

Description of Change:

Dialight would like to inform you that the manufacturing of the listed products is transferring from the Dialight de México facility located in Ensenada, Mexico to the Dialight Penang facility located in Penang, Malaysia. Dialight Penang has supported approximately 75% of the Dialight Optoelectronics business, including its CBI® and Prism® Circuit Board Indicator product lines, for over the last 12 years.

The same manufacturing processes will apply during this location change. To ensure product quality and performance is equivalent to the current manufactured products, manufacturing evaluations will be performed along with First Article Inspections and supporting production data to account for this change in manufacturing location. This is scheduled for completion prior to approval for shipment from the Dialight Penang facility.

Reason for Change:

Dialight is beginning to move the remaining 25% of Optoelectronics business to the Dialight Penang facility in order to provide a consistent and focused level of service and support to our customers.

Penang will produce both LED and Classic PMI products, in addition to their existing product lines for further specialization and focus towards OE products.

This will complete the Dialight Optoelectronics manufacturing transfer plan and position the Optoelectronics business for future growth.

Properties of Old vs. Changed Product:

Change in COO. Products will be manufactured in Penang , MYS and no longer manufactured in Ensenada, MX

Disposition of Old Product:

Use existing stock until depletion.
