Information Note
Introduction of a second source for the polyester film for 63-V types of the B3252* series

To support supply chain stability and to further provide high product quality, an approved second source for the polyester film used in the 63-V types of the B3252* series of low-voltage polyester film capacitors will be introduced, as the previous supplier has ceased manufacturing. The alternative film material exhibits equivalent properties to the currently used material. Therefore, there will be no changes to the manufacturing process or the component specifications. The ordering codes remain the same.

Due to current market conditions, the cost of PET capacitors for 63 V DC has risen, which will be reflected in the product pricing.

Affected products

Ordering code
B32529*0*
B32520*0*
B32521*0*
B32522*0*
B32523*0*
B32524*0*
B32526*0*

Scheduled date of introduction: January 11, 2027

Enclosure IN (ID No. Film 26.029)

Contact Felipe Oliveira, CAP FIM I&A, Munich

Customers are asked to address inquiries directly to their sales contacts.

Information Note

1. ID No. Film 26.029		**2. Date of announcement** September 25, 2026	
3. Product / product group B3252* series of low voltage polyester film capacitors	**Old ordering code** B32529*0* B32520*0* B32521*0* B32522*0* B32523*0* B32524*0* B32526*0*	**New ordering code** No change	**Customer part number** NA
4. Description of change Introduction of an approved second source for the polyester film used in the 63 V DC types of the B3252* series. There will be no changes on the manufacturing process.			
5. Effect on the product or for the customer (benefit, quality, specification, lead time) The alternative film material exhibits equivalent properties to the currently used material. Therefore, there will be no changes to the manufacturing process or the component specifications. The component properties are not affected by the addition of the second source, as specified in the data sheet, which provides a benefit to the customer without causing any disruptions in the supply chain for confirmed orders. The second source of supply is a necessary measure to maintain the supply chain of low-voltage polyester film capacitors following the discontiuation of Mylar operations in this area.			
6. Quality assurance measures / risk assessment The second source supplier is already approved and in use by TDK.			
7. Scheduled date of change January 11, 2027			
8. Estimated date of first delivery of changed product January 11, 2027 ☒ For an interim period we cannot rule out that old as well as new products will be shipped. ☐ Future shipments can consist of old and new products as the new changed product is used as an alternative to the old product.
