General Product Description:
MT 2P / MT 3P / MT 4P

Description of Changes
Current Condition: Products are packed using a two-level packaging configuration, where multiple inner packages are contained within an outer carton. New Condition: The packaging configuration will be changed to a single-level packaging format. Products will be packed directly into the outer carton without individual inner packages. Product design, materials, manufacturing process, and quality characteristics remain unchanged. This change only affects the packaging configuration. PPAP Submission PPAP submission is not required for this change, as it only involves packaging optimization and has no impact on the product or manufacturing process. Reason for Change (Optional): To simplify the packaging process, improve logistics and warehouse efficiency, and reduce packaging material usage. No impact on product fit, form, function, reliability, or performance.
