The additional manufacturing site in China uses the same design, material, and manufacturing process as the existing site. The inductors produced at the additional manufacturing site will meet the same data sheet specifications as the inductors from the existing site. The standard packaging quantity, packing trays, and boxes used at the existing site will remain the same.

The form, fit, function, quality, reliability, and country of origin of the affected part number will remain the same. Traceability will be maintained through lot code and date code.

Samples are available upon request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

Date that deliveries of products manufactured at both manufacturing sites will begin: ***April 5, 2027***

First date code using the above changes: ***2714***

Orders for the affected part numbers received after April 5, 2027 may be filled interchangeably from the existing manufacturing site or the additional manufacturing site.

If you have any questions or need additional information, please feel free to contact Customer Service/Inside Sales.

Users should verify that the described changes will not impact the performance of the product in their specific applications.
