PRODUCT UPDATE **MEMO**

MAGNETICS

REVISED SEPTEMBER 2, 2026

Bourns® CVH160808H Series Multilayer Power Chip Inductors

Change to Country of Origin

Riverside, California – August 28, 2026 – Bourns is standardizing the country of origin ("COO") determination process for the CVH160808H Series multilayer power chip inductors where the primary manufacturing country differs from the final processing country.

This change reflects Bourns' determination to place greater weight on the primary manufacturing processes rather than the final processing steps when determining the applicable COO for these inductors.

Accordingly, effective December 14, 2026, Bourns will update the COO for the inductors listed below in all documentation as follows:

Product Number	Existing COO	Revised COO
CVH160808H-1R0M	Taiwan	Philippines
CVH160808H-1R5M	Taiwan	Japan
CVH160808H-2R2M	Taiwan	Philippines
CVH160808H-R24M	Taiwan	Japan
CVH160808H-R47M	Taiwan	Philippines
CVH160808H-R56M	Taiwan	Philippines

There are no changes to the fit, form, function, quality, or reliability of the affected products. In addition, there have been no changes to the locations of the primary or the final processes.

This update will impact only the COO that new labels and shipping documents show for the affected products.

Bourns will make the COO certificate available upon request.

Implementation dates are as follows:

Date that labels and shipping documents reflecting the current COO will cease: ***December 13, 2026***
Date that labels and shipping documents reflecting the updated COO will begin: ***December 14, 2026***
First date code using the above changes: ***2651***

If you have any questions or need additional information, please feel free to contact Customer Service/Inside Sales.
