.. the power to perform

POWER ADHESIVES

DATA SHEET

Lightweight Professional Glue Applicators for Arts & Crafts

BOND, SEAL, ASSEMBLE, INSULATE, REINFORCE, ENCAPSULATE, REPAIR, FILL, DECORATE - INSTANTLY

The **HOBBY-TEC 150** lightweight, professional glue gun has been specially designed for hobbycraft use and offers unrivalled reliability, ease of use and exceptional adhesive melt rate for an applicator of this size.

Designed to be comfortable and easy to use with its narrow profile handle and full-hand lever trigger, the **HOBBY-TEC 150** is the ideal tool for all size hands.

An efficient melt chamber reduces the effort required to extrude adhesive and minimises operator fatigue. The thin profile of the tool provides excellent visibility and helps to ensure the correct positioning and quantity of adhesive every time. The **HOBBY-TEC 150** lends itself to applications where small quantities of adhesive are required repetitively, making it ideal for hobbycraft applications as well as general use on a vast number of materials.

*** FABRIC * WOOD * PAPER *
* CARD * PLASTIC * CERAMICS *
... AND MANY MORE!**

Not only can you use the **HOBBY-TEC 150** and **TECBOND** adhesive to Bond and Seal, but, used in conjunction with **TECBOND COLOURED** and **GLITTER** sticks, it also makes an ideal tool for decorating objects, such as books, vases, card and bags, etc.

Standard glue sticks are available in the following colours: red, green, blue, yellow, brown, white, black, gold and silver. Glitters Sticks are available in the following colours: red, green, silver, gold and multi-coloured.

The **HOBBY-TEC 150** range includes a **low temperature version**, shown on reverse.

OPERATING THE HOBBY-TEC 150 IS SIMPLICITY ITSELF.

Load with appropriate **TECBOND** glue sticks

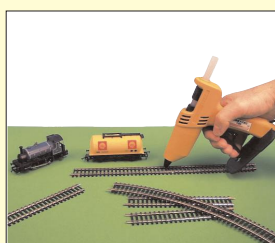

Switch on and wait 5-7 mins for the gun to reach operating temperature

Apply molten adhesive to one surface by simply pulling the trigger

Press parts together for an instant bond

VOLTAGE	100-240V (Electronically self regulating)
HEATER	20-400W (Electronically self regulating)
TEMP CONTROL	HOBBY-TEC 150 (hotmelt) - 190°C self regulating heater HOBBY-TEC 150LT (lowmelt) - 130°C self regulating heater)
WEIGHT	230 grams
POWER CABLE	1.8 m PVC sheathed . UK, European & USA versions available.
MELT RATE	Up to 400 g/hr depending on adhesive formulation
ADHESIVE SIZE	HOBBY-TEC 150 - TECBOND 12mm hotmelt glue sticks HOBBY-TEC 150LT - TECBOND 12mm lowmelt glue sticks.

TEC STAND & TEC MAT ACCESSORIES

The optional metal **TEC STAND (FFS003)** is ideal for when the glue gun is being used on a work surface, making it convenient to return it to the stand after use. It can also be used when it is necessary to remove the integral stand to gain easier access into restricted areas when gluing.

The **TEC MAT** silicon rubber drip mat can be used underneath a **HOBBY-TEC 150** to help keep clean and protect the work surface.

BLISTER PACKAGING

Supplied in an attractive blister display pack, containing four clear general-purpose glue sticks with full operating instructions.

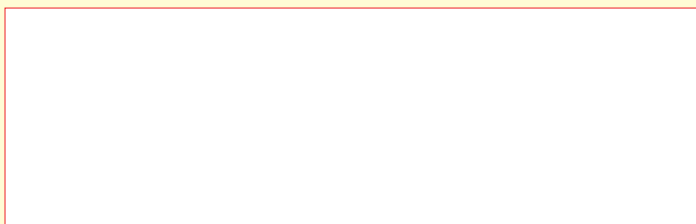

HOTMELT ADHESIVE RE-ORDER

TECBOND high performance 12mm adhesive sticks are specially designed for use in the **HOBBY-TEC 150** gun and are available to bond and decorate a vast range of materials. The **TECBOND** range of adhesive provides variations in setting time,

heat resistance and viscosity to suit every application. Also available are standard coloured and glitter glue sticks for that extra creativity.

HOBBY-TEC 150LT FOR LOWMELT BONDING

The **HOBBY-TEC 150LT** (low temperature) glue gun and **TECBOND**

lowmelt adhesive sticks give an instant bonding system that operates at a lower temperature than

conventional glue guns - nearly 70°C lower. This makes it an ideal system for bonding thermally sensitive materials.

The lowmelt technology is ideal for florists assembling dried flower arrangements, primary and secondary schools for making wooden and cardboard models, art departments in colleges and universities, as well as many other craft and hobby applications. It is even possible to stick decorative pieces onto inflated balloons without heat damage.

LOWMELT ADHESIVE RE-ORDER

TECBOND lowmelt glue sticks are specially designed to be used in the **HOBBY-TEC 150LT** gun. Bonds a wide variety of substrates including paper, board, fabric, foam, film, wood, and many more.

Formulated for application temperatures between 120°C & 140°C.

Designed and built to comply with EN 60335-2-45
