| Different message can be routed to any combination of telephone numbers |
| Delivers one location message and 4 other messages which can be re-recorded as often as required |
| CTR21 Pan European approved |

Example set up

The SD1+ speech dialler accepts up to 4 inputs as shown in the diagram.

A – Fire - Calls telephone numbers 1, 2, 3
B – Personal attack - Calls telephone numbers 2, 3
C – Burglary - Calls telephone numbers 1, 2
D – Auxiliary - Calls telephone numbers 4

The inputs correspond to the messages (A,B,C & D) that the SD1+ sends out and should be recorded as such. If the alarm control panel does not have a fire monitoring capability then the SD1+ can accept a direct connection from a suitable smoke alarm such as the Menvier M12 smoke detector.
