

III. SPECIFICATIONS FOR EACH SERIES

Conductive polymer type

Vertical Surface Mounting Capacitors

It's SVQP series that is vastly improved heat proof by Conductive polymer. Please use SVQP series in surface mounting devices of the switching power supply. It guarantees the rated ripple current at 105°C, and it's not necessary to apply temperature derating provided in other series.

SVP Series

Marking: Polarity(⊖), Rated voltage, Lot.No. (Purple) SVP(Upper E7), Rated capacitance.
