Norton™ AntiVirus 2011

A virus is about to use up
all your computer's sick days.

Allow

Deny

Every click matters.

Norton™
from symantec

In today's online world, the safety of your computer and personal data could be compromised simply by visiting one wrong Web site.

So when every click matters, make sure you make the right one.

With Norton™ AntiVirus 2011, you have the power to defend yourself from cybercrime and DENY harmful malware, viruses, spyware and malicious software the opportunity to gain access to your PC, harm your precious files and steal your identity.

Get essential protection with minimal impact on performance – and always click with confidence.

Product Benefits

- **Protect yourself without sacrificing performance with fast antivirus protection** – Whether gaming, watching movies or doing your day-to-day work, Norton AntiVirus scans only potentially risky files for fewer, shorter scans.
- **Prevent cybercriminals from eavesdropping** – Detects and eliminates spyware that cybercriminals can use to spy on you and steal your personal information.
- **Free technical Norton support¹** – Get help fast when and how you need it, from Norton's extensive online knowledge base, and even live chat with remote access technology to help solve the problem you're facing.
- **FREE 24/7 support** – You can get help and answers by phone, email, live chat or online, whenever you need it.¹

Performance Highlights

With multi-layered Norton AntiVirus technologies you'll have the fast antivirus protection you need from anyone who wants to damage your hardware or permanently delete your irreplaceable photographs, music and other important files ... plus a range of other helpful features:

- Fast anti-virus protection from viruses, spyware and other threats with minimal impact on your PC's performance.
- Norton Reputation Service automatically and quickly checks where files came from and how long they've been around, to identify and stop new crimeware.
- Proactive performance alerts warn you when an application is slowing down your PC, so you can make changes to improve performance. ◀ **NEW**
- Norton Protection System provides overlapping layers of protection that work together to defend against various types of online threats, from dangerous downloads to information-stealing spyware.
- Norton Insight identifies and scans only files at risk for fewer, shorter scans and fast scan speeds.
- Norton System Insight enhances your computer's performance by reducing interference with background uploads.
- Norton Pulse Updates provides frequent updates that protect against the latest threats without slowing down your computer.

- Norton Download Insight warns you if a downloaded file or application is dangerous, before you install or run it on your PC.
- Norton Control Center organises program controls, settings and information about your PC's system status, protection and performance on one easy-to-read screen. It also gives you one-click access to Norton Online Backup. ◀ **NEW**
- Norton File Insight gives you detailed information about the files found on your PC, including where the file came from (the website URL) and if it can be trusted.
- Norton Ongoing Protection automatically downloads software updates in the background as they become available during your subscription period, without interrupting you or slowing down your PC.
- Norton Bootable Recovery Tool creates an emergency CD/DVD/USB that gets you back up and running even if your PC has become so infected that it won't work properly or even start up. ◀ **IMPROVED**
- Email and instant message monitoring scans email and IMs for suspicious links, attachments and other tricks cybercriminals use to steal your identity and your hard-earned money.
- Silent Mode puts alerts and non-critical updates on hold when you're watching movies or playing games in full-screen on your PC.
- Smart Scheduler runs scans and updates only when you're not using your PC.
- Vulnerability Protection stops cybercriminals from using security holes (vulnerabilities) in applications to sneak threats and crimeware onto your PC.
- SONAR™ 2 Behavioral Protection monitors your PC for suspicious behaviour to quickly detect new attacks, crimeware and other threats.

¹ Need help? Symantec™ provides free 24/7 email, chat and phone support for a period of one year from initial product installation and activation.² NortonLive™ Services sold separately. For full details and to access support, go to www.symantec.com/globalsupport

² 1 year protection: With this service, you receive the right to use this product on one PC or on the specified number of PCs during the service period, which begins upon initial installation and activation. This renewable service includes protection updates and new product features as available throughout the service period, subject to acceptance of the Symantec Licence Agreement included with this product and available for review at www.symantec.com Product features may be added, modified or removed during the service period insofar as the product performance and scope is not affected through such change.
