BETAFLEX Conduit Contractor Pack

NEW

Introducing...

New to the Electrical Products Group, a range of Contractor Packs from Tyco Electronics provides the busy electrical installer with a fast and efficient PVC conduit system to IP54.

The new system has been introduced to meet the demands of the commercial premise and industrial installations where wiring requires protection against humid, dust and abrasive environments.

- Easy to carry and store
- Available in 20 and 25 mm bore size
- Single Part Number for a complete system
- Complete with 10 fittings and 10 locknuts

Tyco Electronics BETAFLEX Conduit System

Contractor Pack

PRODUCT OVERVIEW

Contractor Pack - Standard

Key Features

- 10 metres of pliable corrugated tube offers high flexibility - easy installation in restricted spaces
- 10 single piece, snap-on fittings supplied, complete with 10 locknuts for fast installation
- Packed as a single installation unit - only one order number per size
- Ideal for smaller installations and short run manufacturing assemblies
- Suitable for applications with CCTV, electrical and data cabling and where cable protection is required
- Off the shelf availability through selected electrical wholesalers
