

Certification No. HS 28470

tesa 51968 High-strength bonding double-sided tape

Product Description/ Application:

tesa 51968 is a white double sided tape, consisting of a non-oriented PP-carrier and a light and age resistant modified acrylic mass system. tesa 51968 is designed for use in high bond applications. It offers a very strong permanent bond on low energy plastic surfaces.

Using tesa 51968 can remove in some cases, the need for corona treatment on ABS and polycarbonate to achieve a strong bond.

Applications:

- Mounting of mouldings and decorative trim parts
- Especially suitable for permanent bonding on rough surfaces

Dimensions:

Length:	50 m
Width:	1.060 mm

Other dimensions on request.

Technical Data: (Mean values)

Backing:	PP	Adhesive:	modified acrylic
Liner:	paper	Thickness ¹⁾ :	0,3 mm
Colour:	white	Adhesion on steel ¹⁾ :	65 N/25 mm

¹⁾ Parameters of the specification

3582 - 01/96

tesa self adhesive tapes are used successfully in many sectors to solve a variety of problems. Our publications contain numerous examples of such uses, intended to help towards a solution of your particular problems. Each tesa product has been developed for a particular range of applications. Nevertheless, experience has shown that even for one and the same objective, the exact requirements may differ from case to case. We therefore, recommend that you carry out your own tests in each case to determine the tesa adhesive tape which you envisage using is appropriate for your application.
