

20/50 Watt High Quality Moulded Cabinet Loudspeakers

SUB-200 / SUB-500

The SUB range of compact, monitor-style loudspeakers provides the installer with a stylish solution to sound reinforcement in a variety of locations. These diminutive systems are both pleasing to the eye and unobtrusive.

The cabinets are manufactured from a structurally-loaded plastic material with excellent acoustic properties. The SUB-200 is fitted with a high quality full-range driver; the SUB-500 is a two-way reflex design with a more extended bass response. Both systems are ideal for music reproduction.

These products are available in both 8-ohm and 100 volt line versions and come complete with a swivel mounting bracket. Weatherproof options are available and the SUB-500 has Deluxe and Active options.
