

tesa® 4579

Cross-filament tape

PRODUCT INFORMATION

Product Description

tesa® 4579 is a cross-filament tape based on a polypropylene film laminated to glass filaments. tesa® 4579 has a good longitudinal and transverse tensile strength.

Main Application

Ideal applications include bundling and strapping heavy goods, securing pallets and reinforcing of shipping cartons, which are exposed to shock during transport.

Technical Data

■ Backing material	glassfibre / BOPP	■ Adhesion to steel	8 N/cm
■ Type of adhesive	synthetic rubber	■ Elongation at break	10 %
■ Total thickness	145 µm	■ Tensile strength	230 N/cm
