

Digital Audio Anywhere

From the leader in PC audio and high-quality audio solutions, Creative® announces the NOMAD® digital audio player/voice recorder. Creative NOMAD supports the latest audio compression standard, MP3, for exceptional sound and clarity. Record from your personal CD collection, download MP3 files from the Internet, mix your favorite selections, and take them anywhere – working out, trekking through the Gobi, or just biking to work. You can also use NOMAD as a dictaphone to take notes, record a message to a friend or colleague, and then upload content directly to your PC. NOMAD also has a fully functional digital FM tuner to preset your favorite music or broadcast stations.

The Creative NOMAD digital audio player is a compact, non-mechanical device for skip-free continuous playback no matter where you take it. With a combined 64MB of RAM, the Creative NOMAD holds 1 hour of CD-quality music (or more with adjustable bitrate encoding) or 4 hours of voice-recording. Removable flash memory card support enables you to upgrade your player in one step, and allows you to take your favorite content from music, spoken-word, or broadcast for the widest variety of digital content without the hassle of carrying multiple CDs or MiniDiscs. NOMAD is the most versatile, portable digital audio player on the market today!

- Download MP3 files from the Internet or your personal CD collection
- 64MB holds 1 hour of CD-quality music or 4 hours of voice recording
- Solid-state digital technology for 100% skip-free clarity

The NOMAD logo is displayed in large, blue, block letters. Below it, in smaller text, is 'DIGITAL AUDIO PLAYER/VOICE RECORDER'. The background of the entire right side of the advertisement is a large, stylized image of a person's face with blue eyes, looking out over a desert landscape with a small figure in the distance.

What You Get with Creative® Nomad®

- The ability to record your favorite songs from your personal CD collection
- Unlimited access to Internet content
- Combined 64MB of RAM (32MB onboard/ 32MB removable flash memory upgrade)
- FM tuner
- Voice-recording capabilities
- Customize your content with Environmental Audio (Sound Blaster Live!™ or Live! Value required)
- Non-mechanical for skip-free, continuous playback
- Light-weight magnesium casing
- LCD song title read out
- Docking station to transfer data and rechargeable batteries

Enhanced MP3 Audio with Environmental Audio

With Creative's Sound Blaster® Live!™ card (sold separately), you can do more than just download MP3 files from the Internet or CDs. You have the ultimate flexibility to create your own unique MP3 compilation with Environmental Audio presets such as Concert Hall, Auditorium, and Bathroom.

Nomad Manager

NOMAD Manager is an intuitive, easy-to-use application that allows you to manage, access, upload, and download content between the NOMAD player and the PC.

The Creative Digital Audio Center by MusicMatch™

The Creative Digital Audio Center by MusicMatch is a **special, full-version, unlimited record and encode edition** of MusicMatch's latest software. This all-in-one application allows you to convert .WAV to .MP3 or record your favorite tracks from your personal CD collection into MP3 files for storage and playback on your NOMAD player.
