

TOGGLE Data Cable Strippers

Cyclops, the sheath stripper.

Takes the guesswork out of stripping Twisted Pair (UTP & STP) and Multicore (Screened and Unscreened) Voice, Data, Audio, Security and Fibre Optic Cables up to 11mm OD.

Cyclops is safe – there are no open blades – and simple to use: it adjusts automatically to sever PVC or Low Smoke (plenum) insulation without damaging the braid, foil or conductors.

Cyclops strips all proprietary IOBaseT (AUI and Drop) and Premises Distribution and IBM (Types 1 & 6) Cables.
