GENERAL SPECIFICATION

NOTE: Any requirements not covered by the information contained below should be referred to the N S F Technical Service Department who will be pleased to assist in solving your switching problems

Actuation	Single pole changeover, momentary.
Terminations.	Printed circuit pins
Ratings	Switch. standard 10mA 24Vdc Other ratings on request
Contact resistance	Initial 50 milliohms maximum
Insulation resistance	10 ⁹ ohms minimum
Contacts	Gold plating over silver plated brass
Key width	Narrow (12mm), Broad (17mm)
Key colours	Standard, black Other colours to order.
Operating force	2N maximum
Total key travel	2.5mm maximum
Contact travel	1mm minimum
Contact bounce	2ms maximum
Mechanical life	5 × 10 ⁶ operations at maximum load
Ambient temperature range	-25 to +85°C
Mounting method.	Direct soldering onto standard matrix printed circuit board, with levelling facilities
Materials	Housing, polycarbonate Key, ABS.
Marking	Available to order. Colours and type style to be specified

FEATURES

RECOMMENDED KEY REMOVAL METHOD
1 Operate switch 2 Insert small screwdriver into resulting gap at 'A' 3 Gently twist
NOTE When removing keys from within a matrix e.g. No. 3 above, first remove Nos. 9 and 6 by the above method, then remove No. 3

Half key variation enables legends to be standardised or alternative functions to be marked.

Stand-off lugs minimize solder-creepage

Keys are detachable and interchangeable with improved push-on design
