

# Gender pay gap report 2018

Avnet Group

# Overview

Gender Pay Gap legislation, under the Equality Act 2010, requires a UK employer with 250 employees or more to publish their gender pay gap for their employees. The gender pay gap measures the difference between men and women's average earnings in a workforce and is expressed as a percentage of men's pay. This does not involve publishing individual employee's data.

## Gender pay vs equal pay - understanding the difference

It is important to separate gender pay gap from equal pay; both consider pay inequality between men and women but they are fundamentally different. The gender pay calculations demonstrate the variance in pay levels between male and female employees across an organisation irrespective of the positions held. Equal pay, on the other hand, considers the difference in pay for men and women in the same employment performing the same or similar work. The existence of a gender pay gap does not mean an organisation does not pay equally for equal work, and to have a gender pay gap is not unlawful as it is often out of the control of the organisation.

# Statutory disclosures

## Our review of the data processes was limited to the following statutory disclosure data:

- The difference between the mean hourly rate of pay of male full-pay relevant employees and that of female full-pay relevant employees
- The difference between the median hourly rate of pay of male full-pay relevant employees and that of female full-pay relevant employees
- The difference between the mean bonus pay paid to male relevant employees and that paid to female employees
- Bonuses include payments for performance, productivity, incentives, commissions, shares, profit sharing and outwork
- The difference between the median bonus pay paid to male relevant employees and that paid to female employees
- The proportions of male and female relevant employees who were paid a bonus pay
- The proportions of male and female full-pay relevant employees in the lower, lower middle, upper middle and upper quartile pay bands

In order to provide a more complete picture of the gender pay gap within Avnet we have analysed our results across our UK based companies as a whole. We believe this provides a more comprehensive representation of gender diversity within the organisation.

In this report you will find the statutory disclosures required under the legislation as well the overall results of all Avnet companies within the UK.

The Avnet Group companies included are Avnet EMG, Alpha 3, Farnell UK Ltd, Combined Precision Components (CPC) and Premier Farnell Ltd.

Our commitment to being an inclusive and diverse organisation extends across the entire group and it is therefore important we understand our successes as well as areas for improvement.

## Avnet Group

### Pay & bonus gap

The table below shows our overall mean and median gender pay gap based on hourly rates of pay as of the snapshot date 5th April 2018. It also captures the mean and median difference between bonuses paid to men and women in the 12 months to 5th April 2018.

Hourly pay

Bonus

	Mean	Median
Hourly pay	22.0%	10.0%
Bonus	41.9%	0.3%

**MALE**

**FEMALE**

Our analysis across the group has produced a similar result to last year. We have identified that the pay gap is largely driven by the lower proportion of females in leadership and senior roles throughout the business. This is a circumstance that is common across all the companies within our group.

This has contributed to the existence of a 'bonus pay gap', given that senior roles across the group are generally offered the opportunity to earn higher bonuses and these positions are predominantly occupied by men.

Once again there is very little difference between the number of men and women receiving a bonus. This demonstrates that there are no concerns in terms of the opportunity to earn a bonus provided within the group and it also re-emphasises that the gap is largely driven by the number of men in senior positions.

## Pay quartiles

The below chart shows you the gender distribution at Avnet Group across four quartiles totalling 1910 employees. This demonstrates the imbalance in the proportion of females in more senior, higher paid roles.

# Closing the gap

We are absolutely committed to reducing our gender pay gap and delivering initiatives that will tackle this imbalance. Over the past year we have introduced schemes designed to tackle the disparity but we also recognise that there are no quick fixes, and would expect to see results over the longer term rather than the short term. There still is more to be done and we continue to build on last year's good work to successfully close our gender pay gap. We will continue to focus our efforts on the following areas:

- **Recruitment & training:** Following last year's commitment we have introduced training initiatives specifically designed to reduce unconscious bias in recruitment activities as well as other training, aimed at managers, which promote the benefits of having a diverse and inclusive work place.

- **Flexible work:** We continue to review our family-friendly and flexible working policies and have successfully made these policies more accessible to colleagues through the introduction of our new HR portal.

- **Beyond gender:** We are committed to ensuring our employees reflect the general population, including nationality, ethnicity, disability, age and sexual orientation. We continuously review our policies with a view to making Avnet an inclusive and diverse organisation where everyone is given the opportunity to reach their full potential.

# Avnet EMG - Alpha 3

This section examines the statutory disclosures from Avnet EMG and Alpha 3

Overall mean and median gender pay gap based on hourly rates of pay and the mean and median difference between bonuses paid to men and women in the 12 month reference period to 5th April 2018.

Hourly pay  
+ Bonus

## Avnet EMG

## Alpha 3

	Mean	Median	Mean	Median
Hourly pay	38.3%	32.7%	24.4%	14.7%
Bonus	48.3%	41.7%	3.7%	-1.5%

## Bonus pay gap

### Avnet EMG

### Alpha 3

# Pay quartiles

The below chart shows you the gender distribution at Avnet EMG and Alpha 3.

## Avnet EMG

## Alpha 3

# Farnell

This section includes the voluntary disclosure of results from our Farnell companies only. (Premier Farnell UK Ltd, Combined Precision Components (CPC) and Premier Farnell Ltd.)

## Farnell

Overall mean and median gender pay gap based on hourly rates of pay and the mean and median difference between bonuses paid to men and women in the 12 month reference period to 5th April 2018.

Hourly pay

Bonus

	Mean	Median
Hourly pay	17.2%	5.7%
Bonus	51.7%	14.9%

# Bonus pay gap

## Farnell

# Pay quartiles

The below chart shows you the gender distribution at Farnell.

## Farnell

# Premier Farnell UK Ltd

## Combined Precision Components

This section examines the statutory disclosures from Premier Farnell UK Ltd and Combined Precision Components

Overall mean and median gender pay gap based on hourly rates of pay and the mean and median difference between bonuses paid to men and women in the 12 month reference period to 5th April 2018.

	PF UK Ltd		CPC	
	Mean	Median	Mean	Median
 Hourly pay	18.3%	9.8%	0.5%	-6.5%
 Bonus	41.8%	8.9%	24.5%	0.0%

### Bonus pay gap
